Maximize workshop effects

- Customize content to work tasks or skills
- Several, shorter sessions
- Get higher-ups to attend
- Eliminate costs for learners
- Record and share recordings
 - Make available / required for new higher-ups

Workshop pitfalls to avoid

- Coding beyond foundational knowledge, especially in statistics
- Teaching what *you* think they should know
- Being too practiced and polished

Open office hours

Our office hours

- 3 – 4 PM every Tuesday
- Consistent Zoom link
- I attend even if no one indicated they have a question
- Work on [TidyTuesday](#) if no one attends

Maximize office hours

- Consider a remote format for accessibility
- Have another task (like [TidyTuesday](#)) to collaborate on if there are no questions
- Find a time that consistently works for the group
- Define themed events to coincide with work deadlines

Office hour pitfalls to avoid

- Repeatedly changing time, day, location, or canceling
- Letting it turn into a social hour
- Taking too many additional meetings for individual questions

Things that didn't work / worked less well

- Department-wide Slack channel
- Department-wide office hours
- Bioinformatics seminar series

Key take-aways

- Dedicate time and personnel to make a change
 - Organize workshops that directly address relevant tasks
 - Create a casual forum like office hours to facilitate on-going learning
 - Build a community of practice
-
- Not everyone needs to become a super user
 - You're not alone!
